FOR FLETCHER'S
CASTORIA

You Sit Where You Always Sat On the Seat of the Implement

You wouldn't think of riding on the back of one of your horses in order to guide your team. If you did you would have to have another person to operate the implement, because you know most farm implements require constant attention.

Then why attempt to operate a tractor in a manner which your experience has proven impractical? It is just as illogical to ride on your tractor in front of the implement, and expect to operate the implement from that position, as it is to operate the implement from the back of your horse.

Any way you look at it you are working at a disadvantage with the ordinary tractor. To do the best work two operators are required, one on the tractor and one on the implement. In these days of extreme labor shortage this is a tremendous handicap. With

the operator on a tractor in front of the implement it is manifestly impossible for him to give the implement attention and make adjustments for varying field conditions without losing time.

With the Moline Universal Tractor you sit on the seat of the implement and have perfect control of both tractor and implement. You are in the best position to observe the work, make adjustments and manipulate both tractor and implement. This holds true regardless of the work being done—plowing, discing, planting, cultivating, mowing, harvesting, etc. There is nothing new about this, we simply apply a principle which millions of farmers have demonstrated to be sound. The Moline Universal gives one man control of greater power than is possible with horses, with the same method of handling and as much versatility.

The one-man feature is just one of many advantages the Moline Universal has over other tractors. It is the only tractor which will do all farm work, including cultivating. It is the only tractor regularly equipped with self starter and electric lights. Non-robust labor can operate it successfully, and it can be worked day and night.

No detail has been overlooked to give the new Moline Universal Model D Tractor positive reliability. The perfected over-head valve 4-cylinder engine develops unusual power, and is economical in operation. It is conservatively rated at 9.18 H.P. Oil is forced to crankshaft bearings under 35 lbs. pressure. Gears are steel cut, drop forged, and heat treated. All shafts are splined. Every working part is easy to get at, and every moving part is enclosed.

"Robson, do you know why you are like a donkey?" the jester queried.

"Like a donkey?" echoed Robson, opening his eyes wide.

"I don't."

"Because your better half is stubbornness itself."

The jester pleased Robson immensely, for, he at once saw the opportunity for a glorious dig at his wife. So when he got home he said: "Dear, do you know why I am like a donkey?" He waited a moment, expecting his wife to give it up. But she didn't. She looked at him somewhat pityingly as she answered: "I suppose its because you were born so."
